

Child-Resistant Pouches w/ Uncompromised Barrier Protection

- **Complies with state regulations**
- **Child resistant**
- **Tamper evident**
- **Maximize shelf life**
- **Protect your flavor profile**
- **Uncompromised barrier protection**
- **Material structure: 5mil foil**
- **Custom printing and sizes available**

Our new child resistant stand up pouch is both child resistant and tamper evident. This is a unique feature combination as many pouch solutions in the marketplace are one or the other, but not both. Once the pouch is filled with your product and heat sealed by your team, a higher barrier ecosystem is created. This ecosystem projects your product's flavor profile while maximizing shelf space.

Our stock pouches are 5mil and labeled with instructions for adult use. Our foil pouch material is specifically designed for low oxygen, low moisture vapor and UV resistance. Due to the excellent barrier characteristics, our pouches provide longer shelf life. Foil also enables our bag to work in applications that require gas (nitrogen) flush.

Certifications:
CFR Title 16, Part 1700 including Part 1700.15 & 1700.20 for Poison Prevention Packaging. Complies with ASTM D3475
