

Customize your bags

- Low minimums great for short production runs
- Affordable plate charges
- Various hot stamping colors available
- Short lead times

More Details:

Make your product stand out with hot stamping. One of the fastest growing trends in customizing stock bags is hot stamping. Hot stamping is a dry printing process in which your logo/image is transferred to the bag using heat and pressure. The ability to apply custom images or text to our inventory items has given customers a new way to attractively enhance the look of their packages without committing to the large minimum quantities required for fully printed projects. Our affordable plate charges and low minimums make this a great printing alternative and ideal for start-ups or special projects w/ short runs.

Minimum: 1 case (usually 500 or 1,000pcs)
 Cost: \$0.19/imprint + plate charges (one-time fee)
 Lead Time: 2-3 weeks

Steps for Hot Stamping

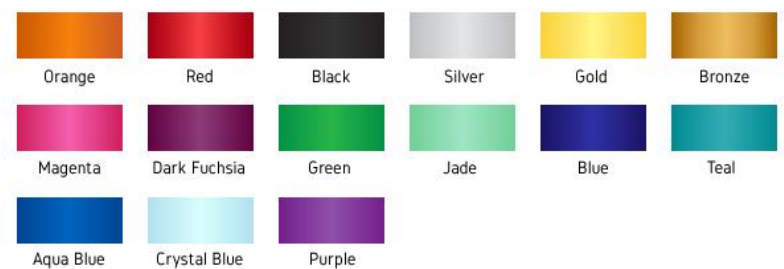

1. Pick a bag size / color for hot stamping (Most of our stock bags can be hot stamped.)
2. Approve artwork
3. Approve hot stamp design
4. Lead Time: 2-3 weeks

Please use the following design software to create your artwork: Illustrator CS6 or lower or InDesign CS6 or lower (Please note that we cannot accept artwork in Photoshop format as the sharpness of text cannot be guaranteed)
