

Stronger containment for heavier loads

Our Shrink Bags are designed to protect pallets and secure loads during transportation. Once the bag is placed over the product, heat is then applied to the film. This results in a glove like cover that prevents the contents from shifting or moving out of place. Shrink Bags are often used in place of stretch film, here's why

- **They provide stronger containment for pallets and loads that are heavier, irregularly shaped or will be outside storage**
- **They serve as a quicker alternative in the palletization process, as they are entirely in one place.**

Shrink bags may be used to cover pallets containing the following products:

- **Corrugated gaylords**
- **Bags of aggregate**
- **Furniture**
- **Sand**
- **Bricks and blocks**
- **Other regularly shaped objects**

Shrink Bags on Roll

Shrink bags are made of a blend of Low Density Polyethylene with a high slip additive and are designed to be shrunk using a heat gun

Stock Number	Size	Pieces/Case	Weight (lbs)
PSB-44-44-70	44 x 44 x 70	25	40
PSB-48-46-72	48 x 46 x 72	25	43
PSB-50-44-57	50 x 44 x 57	25	34
PSB-50-48-84	50 x 48 x 84	25	52
PSB-52-43-70	52 x 43 x 70	25	42

Shrink Bundling Film

Shrink bundling film is made of a 3-layer polyethylene (PE) blend for use with automatic packaging equipment with integral heat tunnels for a bull's-eye closure.

Stock Number	Size	Feet/Roll	Weight (lbs)
PF-16-200-4200	16"	4200	54
PF-18-200-4200	18"	4200	61
PF-20-200-4200	20"	4200	67
PF-22-200-4200	22"	4200	74
