

CONTINUOUS BAND SEALER W/ VACUUM OR GAS FLUSH

Model: **SS-20TAZ**

Ideal for food applications – vacuum / gas flush

SS-20TAZ horizontal band sealer is a high quality horizontal band sealer equipped a nozzle type vacuum device designed to remove 70-90% of excess air from the bag or gas flush (1-12 second timer). Sealer cannot vacuum and gas flush together. The sealer is suitable for all sealing all types of materials and bags. Can seal PE, PP, aluminum foil bags or any other thermoplastic material.

Standard Features:

- Nozzle type device for vacuum (70-95% excess air) or gas flush (1-12 second timer)
- Gas flush unit (SS-20TAZ-G) can either vacuum or gas flush (cannot perform both functions at the same time)
- Variable sealing speed up to 465 inches/minute
- Sealing width - 10mm
- Seals bags up to 7mil thickness (14mil total thickness)
- Maximum conveyor load - 22lbs
- Conveyor belt width - 7.9"; suitable for bags up to 260mm (10.2" length)
- Adjustable conveyor height
- Powder coated frame
- Locking casters
- Unit feeds left to right (option: right to left feed)

Options:

- Dry ink coding date coder
- 220V power
- Wide conveyor widths (11.8" or 15.75")
- Counter (4-digit)
- Bag trimmer (not available with date coder) – must test bag first
- Stainless steel construction
- Seal throat depth of 3.5" or 5.4"
- Gas flush to extend shelf life
- Filter

Specifications:

Electrical	110V Power, 1 Phase, 50/60Hz
Air	Non Required
Sealing Speed	Variable up to 315"/min
Seal Width	10mm (0.393")
Temperature Range	0 -399°C (0-750°F)
Max Bag Weight:	22-lbs
Seal Height of Conveyor	750-850mm (29-33.5")
Conveyor Length	1100mm (43")
Conveyor Belt Width	7.9"
Weight	Net: 240-lbs / Gross: 320-lbs
