

Make your own void fill – easy to use

The SS-5980 Paper Dispenser with Crumple Device is simple and easy to use. Simply load the roll of Kraft paper onto the machine and feed the paper into the condenser where the paper is turned into usable void fill material used for packaging. The SS-5980 is designed for businesses who want to gain a big business advantage in protecting their products with limited space.

### Standard Features:

- Modular design
